

**Exam. Code : 103204****Subject Code : 9035****B.A./B.Sc. 4<sup>th</sup> Semester (Old Syllabus 2014)****MATHEMATICS****Paper—II****(Number Theory)**

Time Allowed—Three Hours] [Maximum Marks—50

**Note :—** Attempt **FIVE** questions in all selecting at least **TWO** questions each from Sections A and B. All questions carry equal marks.

**SECTION—A**

I. (a) Let  $a \in \mathbb{Z}$ . Show that  $a^2$  leaves the remainder 0 or 1 when divided by 4 and hence show that 11111 is not perfect square.

(b) Show that  $\frac{a(a^2+2)}{3}$  is an integer for all  $a \geq 1$ .  
5,5

II. (a) Prove that  $(a, m) = (b, m) = 1$  iff  $(ab, m) = 1$ .

(b) Prove that there are an infinite number of primes of the form  $4n + 3$ .  
5,5

III. (a) Verify that  $2^{2^5} + 1$  is divisible by 641.

(b) Prove that if  $2^n - 1$  is a prime, then  $n$  is prime.  
5,5

IV. (a) If  $p \geq 5$  is a prime number, then show that  $p^2 + 2$  is composite.

(b) Show that necessary and sufficient condition that a positive integer  $n$  can be divided by 3 is that the sum of its digits is divisible by 3.  
5,5

V. (a) For any prime  $p$ , prove that

$$(a + b)^p \equiv a^p + b^p \pmod{p}.$$

(b) Find the general solution of  $39x - 56y = 11$ .  
5,5

**SECTION—B**

VI. (a) For any prime number  $p$ , prove that

$$(p - 1)! \equiv -1 \pmod{p}.$$

(b) Solve the set of simultaneous congruencies  
 $4x \equiv 3 \pmod{5}$ ,  $5x \equiv 2 \pmod{6}$ .  
5,5

VII. (a) If  $m > 2$ , then prove that  $\phi(m)$  is even.

(b) Find the least positive integer that gives remainder 1, 2, 3, when divided by 3, 4, 5 respectively.  
5,5

- VIII. (a) If  $\tau(n)$  denotes the number of positive divisors of  $n$ , then show that

$$\prod_{d|n} d = n^{\tau(n)/2}, \text{ for an integer } n > 1.$$

- (b) Find the highest power of 18 that is contained in  $500!$ . 5,5

- IX. (a) For any positive integer  $n \geq 1$ , show that

$$\sum_{d|n} \phi(d) = n.$$

- (b) Verify Mobius Inversion formula for  $n = 24$ . 5,5

- X. (a) Prove that the function  $\mu$  is multiplicative.

- (b) Evaluate  $\tau$  and  $\sigma$  for  $n = 3000$ . 5,5
